

Others will Call It The Biggest
Technology Shift of 2019.

You'll just call it...

"The Day Your Smartphone Made You Stupid Rich"

Get in Before Monday December 2nd to
Lock in Your Shot at a Fortune from this
Revolutionary Technology

Dear friend,

See this building?

It's the headquarters of a little known organization...

An organization that is developing the global standards for a technology that industry leaders are calling...

The "Catalyst for the Next Technology Revolution"

Steve Mollenkopf, CEO of Qualcomm says this tech "will have an impact similar to the introduction of electricity."

And the Financial Times is calling this innovation "one of the most important developments in human history..."

That's because this radical new technology is on track to create a whole new industry worth \$12.3 TRILLION.

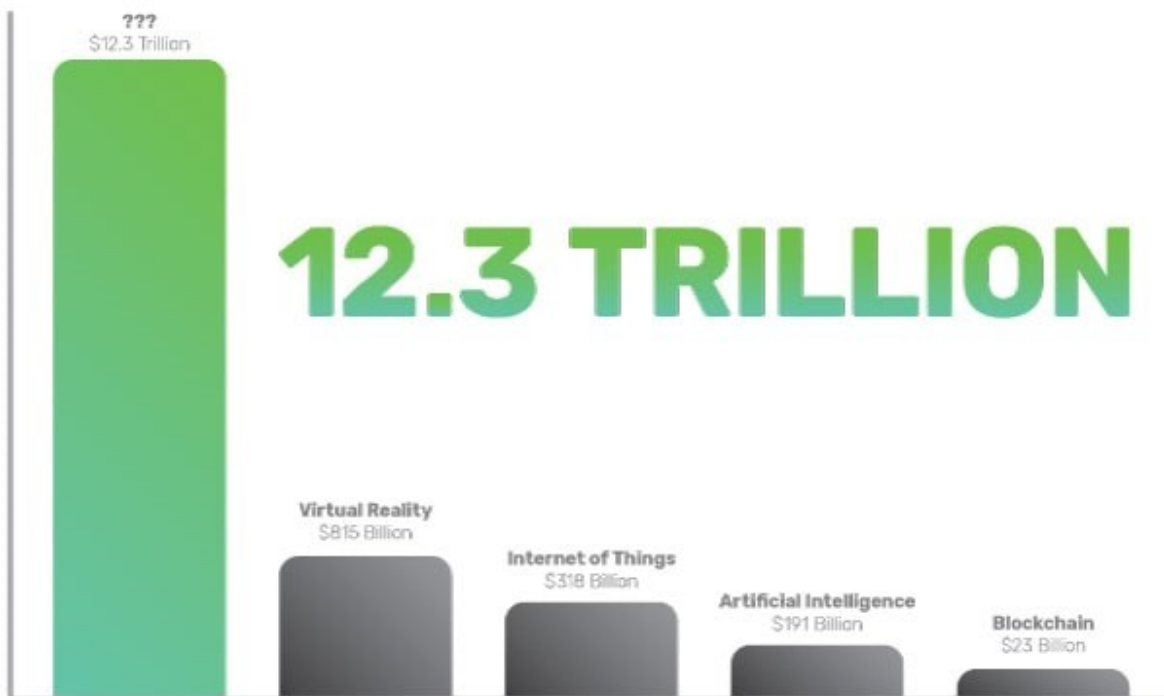

As you can see, it will be bigger than Blockchain – projected to hit \$23 Billion...

Bigger than the Internet of Things – projected to reach \$318 Billion...

Bigger than Artificial Intelligence – set to reach \$191 billion...

Bigger than Virtual Reality – estimated to reach \$815 Billion...

In fact, experts predict it will be almost TEN TIMES Bigger than all of these COMBINED.

But this revolutionary technology isn't coming out any big technology company in Silicon Valley.

Instead, the standards for this radical technology are being developed 5,993 miles away...

In that little-known building you see above.

And I found a \$5 stock that's at the center of it all...

I'm talking about one company's scientific advancement that is poised to create billions - possibly even TRILLIONS - in new wealth...

Starting just a few days from now. The announcement could come as soon as December 2nd...

And Once the news hits the media, you will have a chance to triple your money in just a few short days...

This is not hype.

Earlier, more primitive versions of this exact same tech already gave investors the chance to turn \$1,000 into \$49,310, \$173,730, and even \$738,830 over time.

If you missed out on those gains, don't worry...

Because you have a second chance today.

Just imagine what will happen to this tiny company - trading around \$5 per share.

When it rises to the top of a new industry worth \$12.3 trillion.

Shares will jump through the roof.

There's no telling how high it could go.

We're talking about an industry that's produced gains like 16,934%.

And that's actually a conservative estimate.

That means if you jump in now, you could turn every

\$100 into \$16,934...

\$1000 into \$169,340...

And \$10,000 into \$1.69 million.

How can I be so certain?

**Because this \$5
company has already
locked in at least 30
major deals with**

international telecom corporations...

I'm talking Verizon... Sprint... T-Mobile... Orange Group...
AT&T... China Mobile... And many others.

Not to mention the 299 patents they have on this new
technology...

A tech the Associated Press says will become "the
backbone technology of the future."

It's almost like this \$5 company is preparing to become
THE 800lb Gorilla in an industry expect to grow to \$12.3
trillion in the coming years...

An industry President Trump said "will absolutely be a
vital link to America's prosperity and national security in
the 21st century."

This is such a no-brainer that the biggest players on Wall
Street are jumping in with both feet...

Bank of America has invested \$102 million...

AllianceBernstein has poured in \$169 million...

Levin Capital \$148 million...

ArrowStreet Capital \$134 million...

Mackenzie Financial \$107 million...

And while I don't know for sure exactly what these companies are anticipating...

I do know that they wouldn't make such huge investments expecting to lose it all.

In fact, it's much more likely that...

They're all getting ready for the big event coming as soon as December 2nd

Because "Phase 2" of the plan to standardize this new technology will be completed in December.

Once the global standards are complete, this new technology will spread across the globe.

And trigger an explosion of new wealth.

So you NEED to take action by December 2nd...

Or risk getting left behind.

Forbes has already confirmed, saying:

A graphic of a torn piece of paper with a quote from Forbes. The text is in bold, black, uppercase letters. To the right of the quote, there are some faint, partially visible words from the original source: "yo", "...C", "anc", "TI", "go".

**“IT’S A FOREGONE CONCLUSION THAT
2019 IS THE YEAR THIS TECHNOLOGY
BECOMES REALITY.”**

And that means this year...

Just days from now...

You’ll have a once-in-a-lifetime chance at a staggering amount of wealth.

The kind of wealth that will make your family rich - and keep them that way for generations.

And it all starts with the one company at the heart of this massive technological shift.

Even if you only have a few dollars to start, it’s fine.

I mean, this company is still dirt cheap at \$5 per share.

So even a thousand dollars can make you a fortune.

With an opportunity like this - the most important thing isn’t how much you put in...

It only matters that you get in early.

Remember, based on my conservative estimates...

You could easily turn every \$1000 invested into \$169,340
- or more.

And I'm not just pulling that projection out of a hat...

**This is all based on
gains investors saw
when old, more
primitive versions of
this tech were
introduced to the
market**

You see, this is all happening behind the walls of a little-known building 5,993 miles away from Silicon Valley.

I'm 100% certain you've never heard of this place...

Because this isn't the headquarters of any major tech company.

Instead, it's where a powerful and secretive group of scientists meet to develop standards for new, revolutionary technologies.

I'm talking about a group of seven of the most influential technology organizations in the world.

Organizations like...

The Association of Radio Industries and Businesses...

The Alliance for Telecommunications Industry Solutions

And the Telecommunication Technology Committee

They never publish financial statements...

And they never issue press releases.

But behind the scenes they've been developing the standards for a new type of communication network...

One the likes of which we've never seen before.

**This new breakthrough
is the final version of a**

technology that's been in development since 1998.

Its first version was released in 2001.

When this group first published their findings for that primitive version, shares of companies in that space shot up an average of 6,992%.

Not bad.

But remember... that was just the first version.

After a decade of improvement, they released the second version in 2011...

This time, shares in that sector soared 16,934%!

Now, in 2019, this organization is preparing to release the new standards for the most advanced version of this tech...

And the next step in their plan will be completed as early as December 2nd.

And I'm 100% confident we'll see even BIGGER gains...

Because this time this tech isn't just a game changer...

It's THE game changer...

Because it will change the way you do just about everything...

The way you commute...

The way you get healthcare in your golden years...

The way you communicate with friends and family...

And more important... the way you retire...

Because today you have a rare chance to turn a small stake into an absolute fortune...

- I'm talking about gains like 16,964%.

...and it could start as soon as this document is released on December 2nd.

That's why I'm writing to you today...

To show you how you can get in on this opportunity before that deadline.

Because after December 2nd the World Will Never be the Same

Because December will mark the end of “Phase 2” of the plan to standardize this new technology.

This technological revolution is already well under way.

Once the standards for this new tech are completely developed, it won't be a matter of “if” this new tech will take off...

It will be a matter of “when.”

This is your chance to get in before it becomes a global phenomenon. Which is why you need to act early—if you miss December 2nd, you may very well miss the phenomenon.

Once these standards are finalized and this technology is adopted across the globe...

This \$5 company could quickly become a \$10 company... then \$20... Then \$30...

It will only be a matter of time until the mainstream media catches onto its meteoric rise...

And millions of individual investors and mutual fund managers start jumping on the bandwagon, pushing shares even higher.

We are moving closer and closer to what is likely to be a watershed moment.

Look, If you missed all the gains from the previous two versions of this tech, don't worry.

You're not alone.

And I can't blame you.

These reports are released in secrecy... with little fanfare.

So most people end up missing these opportunities.

And of course... by the time the mainstream media starts reporting...

It's already too late. The big gains have been made.

They're always late to the party. I'm sure you've noticed that too, right?

In fact, while most people are clueless about this breakthrough...

I've been following this tech development since 2012

Hi, my name is Brian Rose... and I've been a tech junkie for as long as I can remember.

While I was earning my engineering degree from MIT...

I was contracted by NASA to help salvage the Galileo Space probe mission.

But I didn't really want to be an astronaut... so after I graduated, I became the CFO of a little known tech start up that sold high-end luxury goods online.

And after hearing about my success, big banks on Wall Street recruited me to run a desk trading derivatives.

During that 15 year career on Wall Street...

I made a lot of money for myself and my clients, but I eventually left it all behind...

I just couldn't deny my techie roots.

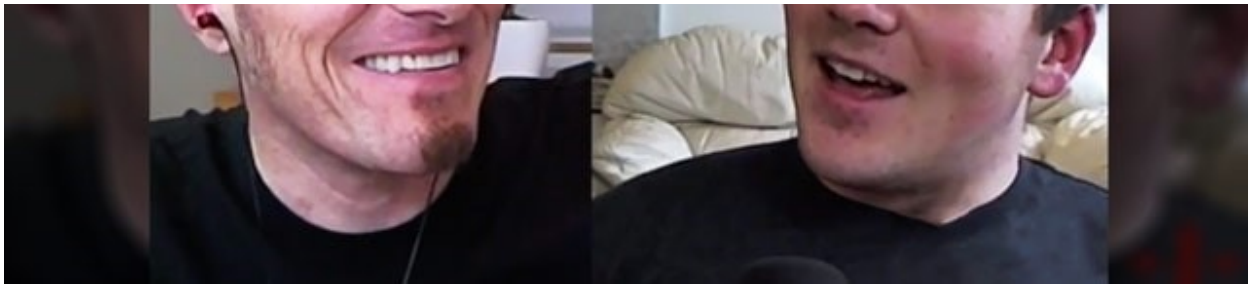

So when I left Wall Street to live in London, I chose to live right at the heart of the technology scene - in a little area the locals called Silicon Roundabout.

And thanks to my connections in the tech industry, and my physical location in the heart of London's Silicon Valley...

I've had the chance to meet and talk to people who have gone on to create and lead billion dollar tech companies.

People like John Collison, CEO and Co-Founder of \$20 Billion Stripe...

Ian Foddering of \$238 Billion Cisco...

And Diane Perlman of \$975 Billion Microsoft...

More important, I've talked to Mike Moghaddas...

Mike is a former engineer at the \$5 company I've been telling you about today.

Back when Mike worked for those guys, they were developing the technology for Airplane Mode...

Since then, this tiny company has already exploded 260%...

Which is great...

But nothing compared to what's coming...

Because now this \$5 stock is set for explosive growth in the next few years, as it dominates a \$12.3 trillion new industry.

I wouldn't be surprised if we see massive gains.

After all, the last time this happened some stocks shot up an incredible 16,934%...

Unfortunately, most people will miss out because...

**I'll bet not one in 1,000
Americans know about
this little known
telecom society that's
about to change
technology as we know
it as soon as
December 2nd**

They meet in secrecy in their headquarters located 5,993 miles from Silicon Valley...

Probably to avoid attention from the media.

Together, they work on setting the exact wave of telecom frequency that makes the world function...

These global standards are what allow you to buy a phone that was manufactured in China...

Connect it to a service provider's network in the US...

Securely login to your bank account...

Take it with you on your vacation to Rome and connect to the hotel Wi-Fi...

And then use it to for a video conference call with your friend who's in Brazil...

All without any hassle or interruption of service.

Every few years this organization publishes this document to update the standards of this new telecom network.

Most of these releases improve existing technology incrementally...

But every ten years or so they produce a document that revolutionizes the tech industry - and the world at large.

The first time it happened was in 2001

That's when they set the global standards that made mobile internet possible.

Thanks to that, smartphones became practical for the first time ever.

In the years that followed they were developed and popularized...

And the few companies who adopted the new network standards saw massive gains.

Take Orange Belgium for example.

When they adopted the new network standards from 2001, they formed partnerships with Motorola, Cellway, and a few others to upgrade their mobile networks.

And because of this upgrade, there were some truly impressive gains starting in those early years.

As a result, they were the first company in Belgium to adapt and implement the new technology.

Their share price soared 888% from \$9.50 to \$93.89.

The same thing happened in America with Shenandoah Telecommunications.

They updated their systems to use the new network and their stock price jumped 523%.

MTN Group adopted the new network and saw their stock price soar 2720%.

Millicom International rocketed 42,553% after they adopted the 2001 network standards and moved into the Latin American market.

Had you invested just \$100 in each of those companies...

You would have made an easy \$46,684...

Invest a little more... say \$1,000...

And you'd be looking at half a million dollars.

And this was just the very first version of this tech... a primitive version.

The gains were even bigger when they released the second, improved version...

Because where the 2001 network standards made smartphones practical...

The 2011 network standards made smartphones fun.

It made high speed mobile internet possible for the first time.

It was possible to stream videos, download music, share photos, and make social media updates.

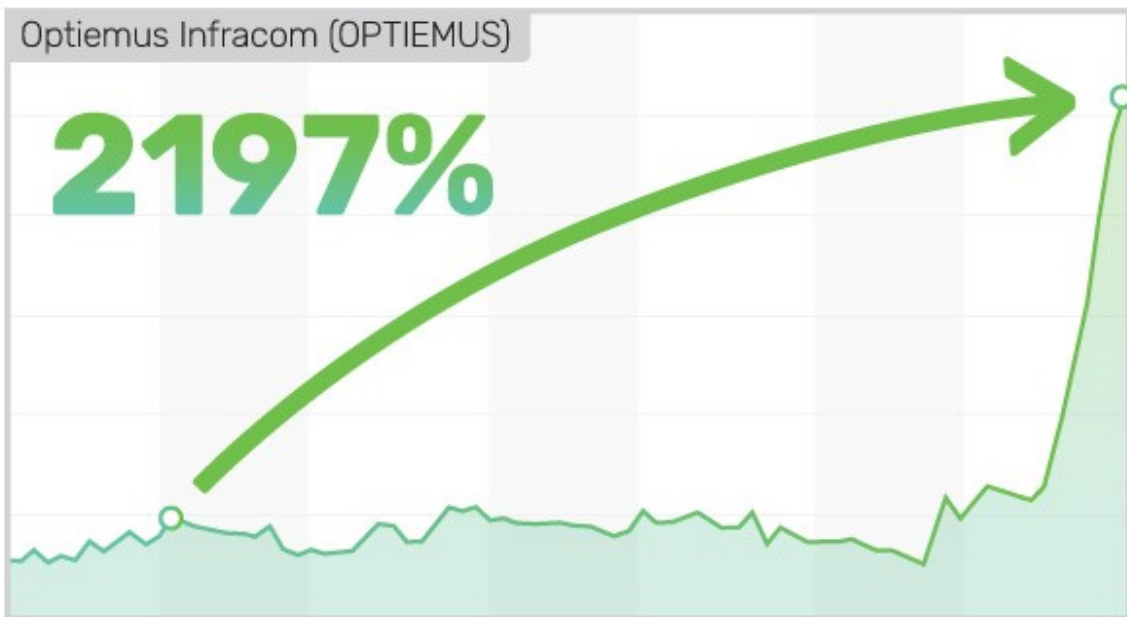

No wonder this time, the gains were even bigger.

Shenandoah Telecommunications adapted the new standards and their share price soared 1015%.

Optiemus Infracom updated their network and saw their stock price grow 2197%.

1&1 Drillisch adopted the 2011 network standards and saw their stock price 1039%.

Or look what happened with shares of VNT. Once the company adopted the 2011 network standards, shares rocketed 308,542%.

Imagine had you invested just \$100.

You would have an astounding \$308,542.

How would that kind of money change your retirement?

I mean, adding 300k to your bank account would make your life a whole lot easier, right?

But here's the thing...

While these gains are obviously not typical...

These aren't the kind of gains you'll read about in the mainstream

Or hear your buddies talking about during your next fishing trip.

These gains are obviously incredible!

But they're nothing compared to what's coming...

Because this new tech will mark...

The END of Cell Phones as You Know Them

Now, I'm not showing you these gains to encourage you to go out and buy as much stock in the telecommunications industry as you can.

I just want to show you that even the primitive versions of this tech was enough to make you rich.

Just imagine how much money you could make when they release the perfected, more advanced version of this network.

And that opportunity is coming up very soon...

With the completion of "Phase 2" of this top-secret project as soon as December 2nd.

There's no time to waste...

As Ignacio Contreras, Qualcomm's director of marketing, says:

"The adoption of [this tech] will be even faster than what we saw [in 2011], which was already fairly fast."

Experts like Dr. Christoph Grote, Senior Vice President of Electronics at BMW, say that...

This new type of network will "become the worldwide dominating mobile communications standard of the next decade."

Caroline Chan, Vice President at Intel says,

"[This tech] will bring a whole new era of communications for consumers and industries of all kinds"

and Robert J. Topol, Intel's General Manager for Technology says,

"[This tech] will be the post-smartphone era."

That's because once this breakthrough is unleashed...

Everything will become a smart device

Imagine a pediatrician from a children's hospital in Boston giving lifesaving treatment to impoverished children in Ethiopia... without leaving his home office.

This tech will make it possible.

Imagine all 1,954 miles of the US-Mexican border being patrolled 24/7 by wireless robots equipped with sensors, cameras, and stun guns...

This tech will make it possible. (Maybe that's why President Trump said recently "we need this tech as soon as possible,")

Imagine a devastating hurricane tearing through Florida... yet within seconds...

Drones have delivered food, water, and medical supplies to the worst-hit areas - saving hundreds if not THOUSANDS of lives.

This tech will make it possible.

Imagine driving through Los Angeles, London, or Miami and NEVER being stuck in traffic because the new smart traffic systems completely eliminate gridlock...

This tech will make it possible.

Imagine never getting in a traffic accident again because your car is able to communicate with other cars on the road - and even the road itself - to avoid hazards and dangerous situations.

Imagine never having to visit a doctor's office for your annual checkup...

Because instead of seeing you in person, your doctor will send you an ingestible health monitor that you swallow...

So it can check your vitals and major organs and warn your doctor of potential dangers like cancer, heart disease, or diabetes... way in advance.

Imagine quantum computers that are 1000 times more powerful than what we use today

And virtual reality used everywhere - in entertainment, medicine, and business.

It will all be possible with this new breakthrough.

That's why The World Economic Forum says it will "benefit entire economies and entire societies"

People and machines all across the globe will be connected and communicating 24/7 - radically increasing the quality of life for everyone on earth.

But in order for this to become a reality...

Telecom service providers will have to upgrade their network infrastructure and software first.

And the demand will be huge...

Because every telecom company that wants to remain competitive in the 21st century will be forced to upgrade their networks.

Not only that, but consumer goods manufacturers will have to adopt the new network if they want to remain competitive.

It's the demand from both the consumer goods producers and the service providers that will unleash \$12.3 Trillion in new wealth.

And there's only one company in the world that's prepared to meet the demand from both.

At time of writing, this company is trading for about \$5.

But once "Phase 2" is completed as soon as December 2nd...

And the new global standards for wireless telecom are revealed to the world...

Shares will begin a historic run... just like the did before, with gains as high as 16,934%

In fact, this company is already on track to make \$3.50 for every smartphone in the world that's compatible with this new technology.

There are about 230 million smartphones in the US alone.

That means the company behind this \$5 stock could be pulling in as much as \$805 million in passive revenue from the US market alone.

Think about what that will do for its shares...

Not to mention the additional revenue that could be pulled in from the combined 2.5 BILLION smartphones in Europe, South America, and Africa, Asia, and rest of North America.

That's a potential \$8.75 BILLION in passive revenue for one tiny little \$5 company.

And remember... they have multi-year infrastructure upgrade deals in place with

- Verizon
- US Wireless
- Telecom Egypt
- Sprint
- T-Mobile

- Orange Group
- AT&T
- China Mobile
- Alfa
- And many others...

All together, they have no fewer than 30 contractual agreements with major global telecom corporations.

Like I said... this \$5 company has such a strong hold on the biggest tech of our generation that domination is virtually guaranteed

Pretty soon this company will be pulling in the lion's share of the \$12.3 trillion generated...

Now, the average investor may not see gains in the triple digits...and when it comes to investing, there's no such thing as a risk-free move.

But savvy investors will have the opportunity to easily turn every \$1000 invested into a fortune.

But Here's the Thing...

Once the 2019 standards for this new network technology are published...

The tech upgrade frenzy begins...

And the Mainstream media catches on...

It will be too late for you to take full advantage of this golden opportunity.

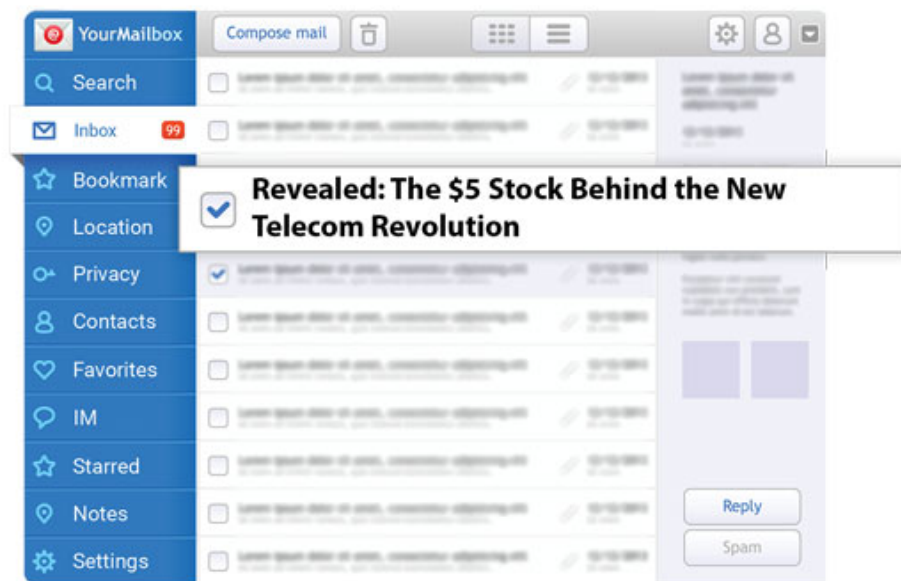

I doubt shares will be trading this cheap, at \$5.

So you'll need to act fast...

Or be left behind while others grow massive fortunes from this upcoming cash grab.

That's why I want to send you a private email with all the details you need to successfully invest in this \$5 stock.

The subject line will be: *"Revealed: How You Can Profit from The \$5 Stock Behind the New Telecom Revolution"*

Once you receive that email...

You should open it and follow the step-by-step instructions, and you'll be ready to ride this new technology wave to massive profits in a matter of minutes.

You'll Be All Set for When the Frenzy Starts on December 2nd

Just imagine how much easier your life will be.

While everyone else is watching their retirement accounts grow 5-10% if their lucky...

You could be sitting comfortably on top of a seven figure nest egg.

Remember, old more primitive versions of this tech already returned exceptional gains like...

1209%, 3601%, even 42,553% and 73,883% over the long term.

That's the potential here...

Gains like that would put you way ahead in your retirement plans, right?

Instead of worrying about having enough money to last you through your retirement...

You could have complete peace of mind as you spend your time doing the things you love.

The peace of mind that comes from having a 7-figure bank account balance.

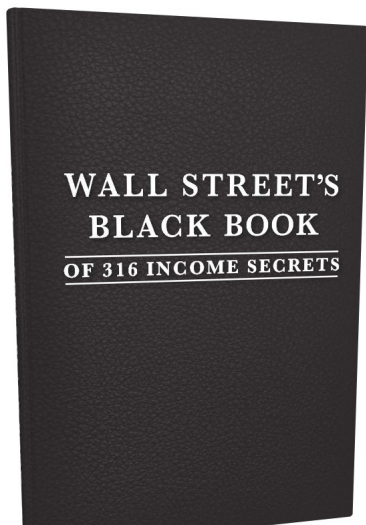

But finding stock investment opportunities is just a small part of what I do...

I'm constantly looking for ways to help everyday people accelerate their retirement.

That's why, in addition to the email about the \$5 tech stock...

I'd also like to give you 316 more ways to accelerate your retirement.

BONUS GIFT #1: Your FREE Copy of Wall Street's Black Book of Income Secrets... Filled Cover-to-Cover with 316 "Retirement Accelerators" (\$99 Value)

The information in this book is none of your business as far as Wall Street is concerned.

But that secrecy end today.

I want to give you all of 316 income secrets they've been

40 years.

keeping from you for the past

And you'll be able to claim your free copy in just a minute.

Inside you'll uncover hundreds of income generating techniques that could put thousands of dollars in your pocket.

Secrets like...

- How to add as much as \$55,623 to your retirement using the “Bucket List” strategy. Discover a cutting-edge technique to create tens of thousands in inflation-proof income WHILE growing your capital (Page 169)
- A little-known Wall Street trick to boost your income by \$759 per month! One of Wall Street’s best-kept secrets allows you to boost your monthly income by potentially

turning every stock in your portfolio into an income- gusher (Page 119)

- Get 10 TIMES more income than America's best savings accounts. This little-known cash-flow strategy gives you the chance to collect roughly 10 times the returns of the highest-performing savings accounts (Page 43)
- As safe as CDs but earns five times more! Fire your bank! You don't need them anymore – not when you can earn up to 5x more than CDs with the same low risk. You can also use this secret to pass your money on to your loved ones without the taxman touching it (Page 173)
- How to earn up to \$2,500 per year while supporting our troops. Discover a high-yield, low-risk way to earn extra cash while doing good

for our brave U.S. veterans. It's a perfect win-win! (Page 75)

- Pocket amounts like \$1,666 in "rent" every month... without owning a single piece of real estate. Discover how to collect worry-free "rental" income... with no down payments, no maintenance and no pesky tenants. Just safe, reliable payments every month! (Page 37)

And we're just getting started here...

This book has pages of secrets that have helped everyday folks like you collect multiple streams of safe and reliable income each month.

Look, you already know that once these opportunities have hit the mainstream, the biggest gains have already been made...

For decades the fat cats have been laughing all the way to the bank while using the mainstream media to play the masses for fools.

But now it's time you to get a few laughs of your own.

Wall Street would charge you through the nose for access to these secrets.

But I've been working to even the playing field ever since I left Wall Street.

So, these techniques can be yours for the taking... Absolutely FREE! I'll show you how to claim them in just a second.

You'll never have to scrape by on whatever Social Security crumbs Uncle Sam gives you when you're armed with secrets like these...

- **Make Uncle Sam pay you for a change.** This technique lets you collect a portion of the rent the government pays to the private sector each year... for a healthy 9.6% yield (Page 97)
- **How to collect "Rich Kid dividends."** Learn how regular investors can take advantage of a lucrative dividend-paying program once reserved for silver spoon children of the 1% (Page 63)

- **Cash huge checks from Wall Street's "inside" deals.** Discover a "backdoor" method to cashing in on Wall Street's best private investment deals (pre-IPO companies, special financing arrangements) that most mainstream investors never see (Page 107)

Now, please understand...

My team has spent over 20 years gathering this information...

We've combed through innumerable government documents...

Waded through oceans of SEC documents...

And spent thousands of dollars researching and testing the income methods we found.

Then we compiled all the best ones in this brand new 503 page book called Wall Street's Black Book of Income Secrets.

This is hands down the most complete book on retirement income strategies.

And it's not available on Amazon or through any other bookstore.

Your only chance to claim it is right here, right now.

When you accept the terms below, I'll send you a copy free...

I'll even cover the shipping.

It's All Part of My Mission to Help You Accelerate Your Retirement

Like I said earlier, my name is Brian Rose.

I grew up in California, but today I live in London with my wife and three kids.

and even though I spent a good bit of my career by helping the Wall Street elites get even richer...

Today, I'm the Chief Retirement Strategist at Paradigm Press.

We're part of one of the largest financial research groups in the world, with just about 2 million readers spread across 60 countries.

And like I said in my popular TEDtalk...

Once I left Wall Street, I felt the need to inspire and help others. That's why I started my mentorship programs and my talk show, London Real.

So when Paradigm Press approached me with an opportunity to leverage my Wall Street experience to help everyday folks accelerate their retirement...

I didn't even think twice.

Now, as the head of our retirement strategies research team, I've specialized in one thing:

Showing moneywise folks just you how to accelerate your retirement through golden opportunities you won't hear about anywhere else.

And every month I publish my best ideas in a research letter called...

Brian Rose's Retirement Accelerator.

I'm on a mission to help show everyday Americans how to not only grow their nest egg to amounts they only ever dreamed of...

But also set themselves with ways to generate multiple consistent and reliable streams of income during retirement...

Because I know that without these wealth-building and income-generating secrets...

Your next best option is likely to retire on social security...

And spend your "golden years" struggling to make ends meet.

I mean, the average retiree lives just above the poverty line - pulling in about \$1400 in monthly Social Security benefits.

That's why I spent the last few months researching the \$5 stock poised to take over the global telecommunications market...

And I'm putting all the details I found in an email I'd like to send to you.

Just look for the subject line in your inbox:

Revealed: The \$5 Stock Behind the New Telecom Revolution

That email will have a link to a special report with all the details you need to know to get in position before the big event starting as soon as December 2

So you don't have any time to waste.

I'd like to send this email to you in the next few minutes.

Along with your free copy of Wall Street's Black Book of Income Secrets...

When you agree to a 100% RISK FREE 180-Day trial membership to my research letter.

And I mean RISK FREE. No commitment necessary.

I just want you to sample Brian Rose's Retirement Accelerator and decide if it's right for you.

Based on the Feedback We've Received So Far, I Think You'll Love It...

"I've made over \$7,800 so far. I'm paying bills with the extra income."

~ Kevin R., Michigan

"I currently get about \$6,068 a year in income from one of your [team's] recommendations. The income generated from my portfolio is big enough that I do not have to draw down any capital... and I will never need SS or IRA distributions."

– Josh S., Chicago, Illinois

“I’m making \$5,487 a year [from one play] and \$3,413 a year [from another]. Using the money to buy other stocks.”

– John S., Menomonee, Wisconsin

“It’s great to make extra income doing nothing.”

– Louis M., Madison, Wisconsin

“It helped pay off the mortgage on a house three years ago.”

– George G., San Diego, California

I can't be more pleased by the riches our research is helping people achieve.

But the Best is yet to come.

Like I showed you earlier, older more primitive version of this tech would have given you the chance to 5x, 10x, and even 40x your money.

For that reason alone, I could easily charge \$1,000s for an annual subscription.

But don't worry.

Our cover price is just \$199 per year. An absolute steal.

But here's the best part...

Because of this historical tech development, I just sat down with my publisher and negotiated a limited-time discount that will blow you away.

So when you take your risk-free 180-Day trial, you won't even have to pay our regular cover price...

I'll show your discount in just a minute.

But first, I almost forgot to finish telling you about the rest of the bonus gifts I'll send you when you take your risk free trial.

Respond in the next five minutes...

And I'll send you

BONUS GIFT #2: Collect Up to \$278 - \$13,673 FOR LIFE Thanks to American "Liberty Vouchers" (\$99 Value)

This piece of paper you're looking at represents \$278.

Fewer than 1 in 1000 Americans know about this unusual certificate.

But you can claim this money for yourself - free and clear - to use however you want.

It's not a stock certificate...

It's not a bond certificate...

It's not a certificate of deposit or a tax refund check, either.

It's a simple investment tool that allows Americans - just like you - to claim some of the money that comes into our country.

The U.S is a lot of things. Some of them good and some of them could be better...

But one the U.S has always been is a magnet for capital from around the world.

And when you get your hands one of these vouchers, you can collect a portion of the money that's poured into our country.

As of now, there's \$626 Billion set to flow into our nation.

Some of that money can be in your pocket.

In fact, some people are already prepared to cashing in.

- Like Jerry Richardson, a 64-year-old from Wilmington, DE. He's expected to cash a \$3,465.33 "Liberty Voucher" check this month.
- Then there's Jill Lawlor, a 96-year-old from Palm beach, FL, who recently collected a check for approximately \$12,909.83 thanks to her "Liberty Voucher."
- And Aaron Rice, a 61-year-old from Dallas TX, expects to receive a whopping \$13,673.78 from his "liberty Voucher" any day now.

These Americans earned a total of \$30,048.94 in a single month thanks to their "Liberty Vouchers."

Keep in mind that Jerry, Jill, and Aaron earned these big checks because of the amount of capital they invested...

But they can expect to receive this steady income for the rest of their lives.

That's why I want you to have everything you need to get started right away.

You'll find all the details inside this bonus report called [The \\$626 Billion American Dream: "Liberty Vouchers" for a Rich Retirement](#) .

Inside, you'll discover the five 'Liberty Vouchers' that could jet-boost your income this year.

With a potential total of 14 incredible checks over the next 12 months...

Checks worth up to \$278 to \$13,673 or more.

this Report is also FREE with your risk-free trial.

But that's not all...

Bonus Gift #3: How to Make \$397, \$491, and even \$589 in 90 Seconds or Less... Anytime You Want (\$99 Value)

I know the idea of consistently generating hundreds of dollars in an instant sounds incredible...

But I used to use this same method with my clients on Wall Street.

And even though some of them used this method to make millions...

This isn't some get-rich-quick scheme.

This is about giving yourself the opportunity to collect consistent income.

This transaction is simple and repeatable, so you can collect hundreds of dollars upfront and over and over again.

You could pocket amounts like \$491 here... \$397 there... \$589 here...

All in just a few minutes.

Do this consistently, and it could add up to some big money over time.

My team has already shared this simple transaction with some people in our network.

And they're collecting incredible amounts of instant income upfront...

People like 58-year-old plumber Steven Saunders, who wrote...

"Man... I just made \$642... this really is a secret loophole... just as advertised."

51-year-old policeman Ryan Towers said...

"I'm stunned, can't believe how easy this is... I just made \$832."

63-year-old retired teacher Jeff Sundstrum said...

"I just made close to \$2000! I'm about to head on vacation."

This isn't some fly by night investment fad or trick.

It has nothing to do with day trading, commodities, or currencies.

This is a simple and safe investment that will allow you to sleep easy knowing you have the power to collect an income check anytime you wish.

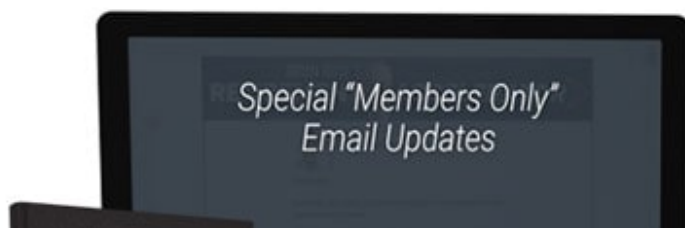

Bottom line... this is about as close to a sure thing as you can get.

And I've put all the details on how to get started in another special dossier called *How to Make \$397, \$491 and Even \$589 in Less Than 90 Seconds... Anytime You Want* .

So just to recap...

When you agree to take a risk-free trial subscription...

Here's Everything You'll Get

- **12 Full Issues of My Monthly Advisory.** For an entire year, you'll receive my monthly research advisory *Brian Rose's Retirement Accelerator*. It includes at least one new idea that could accelerate your retirement each and every month (published price value of \$199)

All told, that’s \$743 worth of value.

But it won’t cost you anywhere near that to take a risk-free trial today.

When you sign up today... you can get everything I just mentioned at a fraction of the cover price.

All I'm asking is just \$49... for everything.

That's just enough to cover our costs for producing the research and keeping this page online.

And gives you with access to all of it at a huge 75% discount.

Now Remember, I'm not asking you to make any kind of long-term commitment.

I'm just asking you to check out my research to see if you feel like it's right for you.

In other words:

Try Out *Retirement Accelerator* for the Next 180 Days!

Read my research and all the special reports...

Decide if you'd like your chance to participate in the upcoming telecom cash grab...

And whatever other opportunities you'd like to take advantage of.

If you don't see the chance to make money...

Or if you decide – for WHATEVER reason – that *Brian Rose's Retirement Accelerator* isn't perfect for you...

Call my customer service team on our toll-free 1-800 number within the first 180 days, and we will issue you a full refund... no questions asked.

Every single penny!

And you can even keep everything you've received...

The issues, the book and every special report – including the special report *Revealed: How You Can Profit from The \$5 Stock Behind the New Telecom Revolution*

That's right! You can keep everything... without risking a single penny!

When you follow my instructions...

You'll be able to position yourself to participate in the upcoming gold rush that I expect to hit by December 2nd.

And that alone could more than pay for your entire subscription... many times over.

Like I showed you earlier...

Had you started with a tiny investment of just \$100 the first time this happened...

You could have watched it grow into a tidy sum worth \$312,793 in one stock in the space.

A \$1,000 dollar investment could have turned into \$3,127,930 nest egg.

And that was the last version of this tech. The gains could be even bigger this time.

Because of all this...

I think we can both agree \$49 is truly a bargain.

But Why So Inexpensive?

Well, first of all... I don't need the money.

Second, I'm from a middle-class family.

I grew up with my grandparents, who were a farmer and a rancher in Colorado.

As I said earlier, I left Wall Street because I couldn't stand the thought of the big banks screwing everyday folks like my grandparents out of their life savings.

Since I've left the Wall Street swamp...

I feel like it's my duty to share all these retirement secrets with everyday folks like you.

I also know millions of other hard working Americans are in a tough spot when it comes to retirement.

For the average retiree couple, Fidelity estimates you'll need \$280,000 just to cover medical expenses in retirement.

How are you supposed to pay for that plus all the other living expenses with a monthly Social Security check of \$1,400?

It's impossible.

That's why I want to help more people...

And the only way I can do that is by reaching as many folks as possible.

I don't want the price to be an issue. That's why I'm offering you one of the lowest rates you'll ever see for my work.

Here's what to do next...

Click on the "Reserve Now" button below.

It will take you to a secure webpage where you can review everything...

And send me your address so I can rush you a copy of our book and everything else I showed you today.

Remember... You Need to Act by December 2nd if You Want your best chance to Participate in this New Telecom Revolution

All you need to do is get in before the mainstream media catches wind.

And you can get started with just \$100.

Now it's your chance to potentially double, quadruple and even make 10 times your money when this tiny company explodes after this document is published.

And the best time to be position is before December 2nd.

My special report *Revealed: How You Can Profit from The \$5 Stock Behind the New Telecom Revolution* will show you how to get started in a few simple steps.

Look, I really don't need the money. Whether you decide to join or not will make no difference in my life.

I'm trying to help you. But only you can decide if this is right for you...

I've given you my very best price offer...

And a "risk nothing and keep everything" 180-Day guarantee.

That means you have zero risk in joining us.

To get started, simply click on the button below.

This will take you to a secure order form page where you can review your order and tell us where you'd like everything sent.

RESERVE NOW

Your FREE copy of our brand-new book will arrive in your mailbox shortly. (I'll cover the shipping costs.)

The bonus reports will be available for download within minutes of you joining us.

Looking forward to helping you accelerate your retirement.

Sincerely,

A handwritten signature in black ink that reads "Brian Rose". The signature is written in a cursive style with a large, stylized 'B' and 'R'.

Brian Rose Editor, *Retirement Accelerator*
July 2019
